

Notice to Mariners

Rampion Offshore Wind Farm

Date of Issue: 09/02/2017

Notice Expires: Ongoing

Dear Authorities, Owners, Ships Agents, Masters, Pilots and Fishermen,

Re: Rampion Offshore Wind Farm - Safe distances around all structures within Rampion Offshore Wind farm

This NTM supersedes and cancels NTM 14 (Scour Protection Installation).

The seabed around all structures (Foundations and offshore substation jacket) contains a number of hazards in close proximity. These hazards can be a combination of:

- Exposed cables
- Scour Protection
- Rock Bags

All Mariners are requested to remain a minimum safe distance of 50 meters from all structures within Rampion Offshore Wind Farm.
