

Wind-powered Painting

What you'll need:

- Plain paper
- A straw
- Some poster paint in different colours (you might need to water it down a bit so it's not too thick)
- An apron to cover your clothes

Method:

- Pour a droplet of paint onto the paper
- Using your straw, blow the paint so it spreads out across the page
- Turn your paper around and blow it in a different direction so the colour spreads out across the page
- Then add another droplet of a different colour and do the same
- Keep adding colours and blowing the paint around the page and you will end up with a beautiful wind-powered painting!
